# HOSES & HOSE ASSEMBLIES

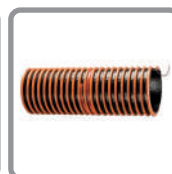

# 01

USA / CHILE

We understand that each industry has specific needs, which is why we offer a wide range of technical hose options in various sizes to meet them. Our products are manufactured with high-quality materials tailored for each application.

- Rubber hoses
- Thermoplastic hoses
- Composite hoses
- Metal hoses
- PVC hoses
- Flat hoses
- Fire extinguishing hoses

# STRAUB COUPLINGS

# 02

USA / CHILE

Swiss Straub couplings offer a quick and highly secure solution for the joining and repair of pipes in various applications. They have multiple certifications for each industry, requiring no special tools, grooving, or welding, allowing a simple and efficient installation.

- Grip couplings
- Plast Grip couplings
- Open Flex couplings
- Plast Pro couplings
- Rep Flex couplings

# HYDRAULIC COUPLINGS

# 03

USA / CHILE

The perfect solution for securely and efficiently joining hoses and pipes. We offer different types of couplings, each designed to meet specific needs in the industry. We provide couplings in various dimensions and materials, such as stainless steel, aluminum, brass, plastic polymers, among others.

- Camlock couplings
- Dixon Boss steam couplings
- Air King Chicago couplings
- Quick couplings
- Sanitary fittings
- Grooved couplings

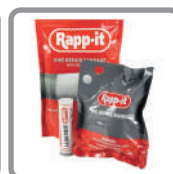

# HYDRAULIC ACCESSORIES

# 04

USA / CHILE

We offer a variety of complementary products for the hydraulic segment, designed to improve the safety and performance of hoses and couplings in industrial, mining and petrochemical processes, with specific alternatives for the needs of each application.

- Hose safety whip check cables
- Hose protections
- Clamps
- Banding clamps and straps
- Strapping machines
- Sealants and additives
- Emergency pipe repair systems

# HOSE CRIMPERS

USA / CHILE

# 05

At KMX, you will find high-quality and precision equipment for the proper assembly of hoses and couplings, as well as support to assist you in the production processes of your business.

- Hose crimpers
- Hose saw
- Hose skivers
- Ferrule markers
- Test benches

Do you need more information about our products?

✉ [sales@kmxusa.us](mailto:sales@kmxusa.us)

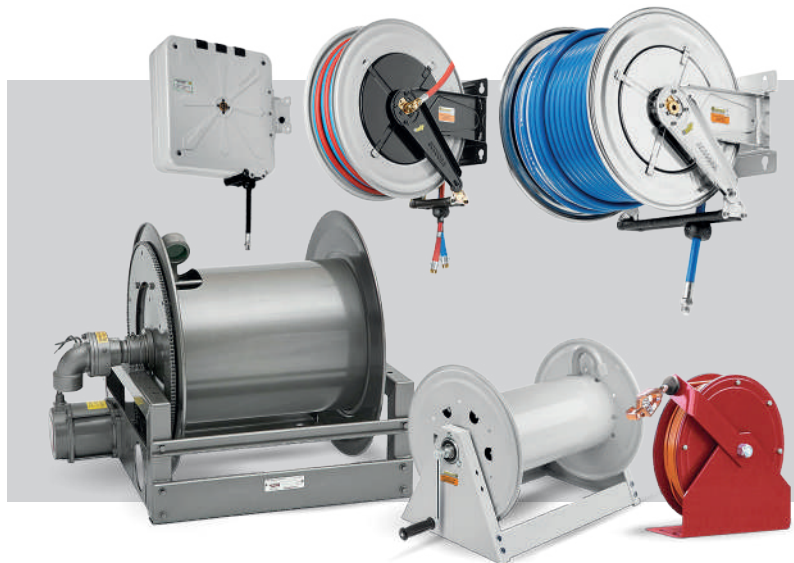

# HOSE & CABLE REELS

# 06

USA / CHILE

Achieve safer and more efficient work environments by simplifying the handling and storage of your hoses. At KMX, we offer a wide range of hose and cable reels designed to meet the needs of each specific industry and application.

- Stainless steel reels
- Grounding reels
- Lubrication hose reels
- Fuel hose reels
- Air & Nitrogen hose reels
- Electric reels

# BLASTING EQUIPMENT

USA / CHILE

# 07

With our high capacity shot blasting equipment, cleaning and surface preparation processes are performed quickly and reliably, reducing loading and unloading cycles, allowing for greater productivity.

- Shot blasting machines
- Blasting helmets
- Hoses
- Nozzles & couplings
- Breathing air filters
- Deadman remote control handle
- Spare parts & accesories

# BLAST CABINETS

# 08

USA / CHILE

Our shot blasting cabinets are made of high-resistance steel. Their abrasive blasting system and cartridge dust collection system allow for a controlled working environment during the cleaning and preparation process of industrial parts, effectively removing rust, paint, and other impurities.

- Suction blasting cabinets
- Pressure blasting cabinets
- Cartridge filters
- Abrasive recovery system
- Spare parts & accessories

Do you need more information about our products?

✉ [sales@kmxusa.us](mailto:sales@kmxusa.us)

# 09

We are focused on providing a wide variety of products with the highest standards of quality and safety for the proper handling of both liquid and gaseous fuels. We offer products from internationally renowned brands such as Dixon Valve, aiming to provide comprehensive solutions that meet the expectations of our customers.

- Fuel nozzles
- Flow meters
- Overfill sensors
- Hoses & couplings
- Breakaway
- API couplers
- Swivel joints
- Hose reels
- Loading arms
- Vent systems
- Valves

# FLOMAX COUPLINGS

# 10

USA / CHILE

Flomax is a brand specialized in couplings manufactured in the USA, an undisputed leader in product quality and innovation. It offers a wide range of solutions for quick and secure connections in the loading of fuels and lubricants, both in equipment and heavy machinery.

- R Series universal couplings
- Flat face couplings
- High flow couplings
- Fuel vents systems
- Fuel nozzles
- Breakaway

# TANK TRUCK EQUIPMENT

# 11

USA / CHILE

We offer a complete range of DIXON VALVE couplings and valves, as well as flow meters, overfill systems, hoses, and retractable reels to equip fuel tank trucks.

- API valves
- Interlock valves
- Drop elbows
- Overfill sensors
- Drop hoses
- Flow meters
- Hose reels
- Fuel nozzles
- Grounding reels

# DRY DISCONNECT & BREAKAWAY

USA / CHILE

12

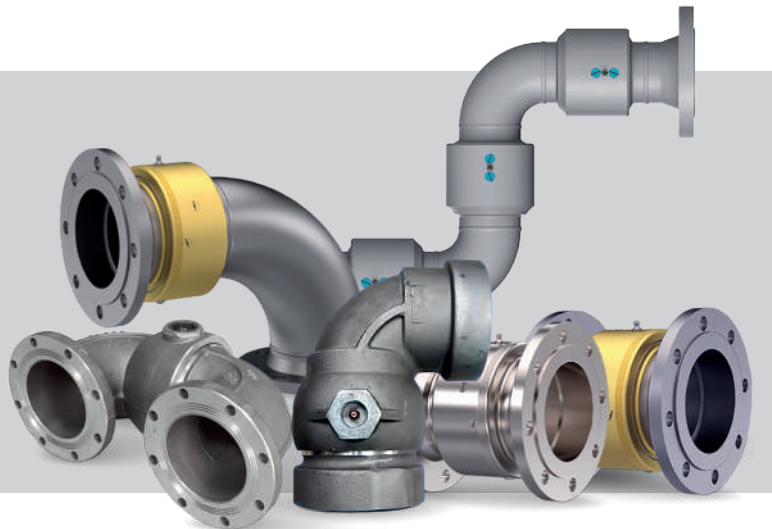

Our Dry couplings and safety Breakaway couplings are designed to ensure fluid transfer processes, even in the specific case of hazardous products such as chemicals and hydrocarbons. A higher safety standard is necessary to prevent spills and accidents due to unintentional disconnection.

- MannTek dry couplings
- Dixon Bayloc dry disconnects
- Breakaway couplings
- Dry couplings for Adblue (DEF)
- Dry couplings for fuel
- Dry couplings for Sulphuric acid

Swivel joints also known as Rotary unions, are mechanical devices used in industrial applications that allow the transfer of fluids or gases through a rotating surface while maintaining a hermetic seal. They are constructed in various combinations or 'styles' based on the number of rotating planes and the angles they have. Rotary unions exist in Single Plane, Double Plane or Triple Plane configurations.

- Swivel joints for fuel
- Swivel joints for chemical
- Swivel joints for high pressure
- Single plane
- Double plane
- Triple plane
- Straight & elbow

# LUBRICATION SYSTEMS

USA / CHILE

# 14

We offer products for high-performance lubrication systems designed to meet the specific demands of the mining, industrial, and automotive sectors, including mechanical workshops and truck shops.

- Piston pumps
- Grease column hoists
- 4-way evacuation valves
- Nozzles
- Flow meters
- Hose reels
- Service columns

# DOUBLE DIAPHRAGM PUMPS

# 15

USA / CHILE

Double diaphragm pneumatic pumps allow the pumping of high complexity fluids or that require compliance with ATEX regulations, using the existing air network. We have a wide portfolio of pumps tailored to the type of fluid to be conveyed.

- Pulsation dampeners
- Basket filters
- Repair kits
- Polypropylene pumps
- Aluminum pumps
- Teflon/Kynar pumps
- Stainless Steel pumps

# ELECTRIC PUMPS

USA / CHILE

# 16

We offer a wide range of centrifugal pumps in various materials and sizes to meet the pumping needs of different industrial and mining applications in your piping systems.

- Horizontal centrifugal pumps
- Vertical centrifugal pumps
- Drum pumps
- Magnetic coupling pumps
- Metal body pumps
- Plastic body pumps

We have a wide range of products for compressed air lines that allow the performance of various tasks such as blowing, tool movement, load lifting, and machinery operation. Pneumatic systems are widely used in the industry and commercial applications due to their reliability and ease of implementation.

- FRL's
- Quick couplings
- Tubing & hoses
- Air nozzles
- Air amplifiers
- Pneumatic conveyors
- Pneumatic tools oil
- Hose reels
- In-Line lubricators
- Check valves

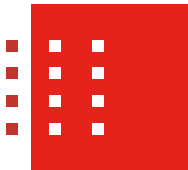

# CABINET COOLERS

USA / CHILE

# 18

Industrial cooling and cleaning system for electrical cabinets and panels equipped with Vortex tubes from the Canadian brand Nexflow. These tubes allow the injection of an extremely cold air flow into the cabinet, reducing the temperature and creating positive pressure inside, preventing the entry of dust and the risk of a short circuit.

- Analogous control systems
- Digital control systems

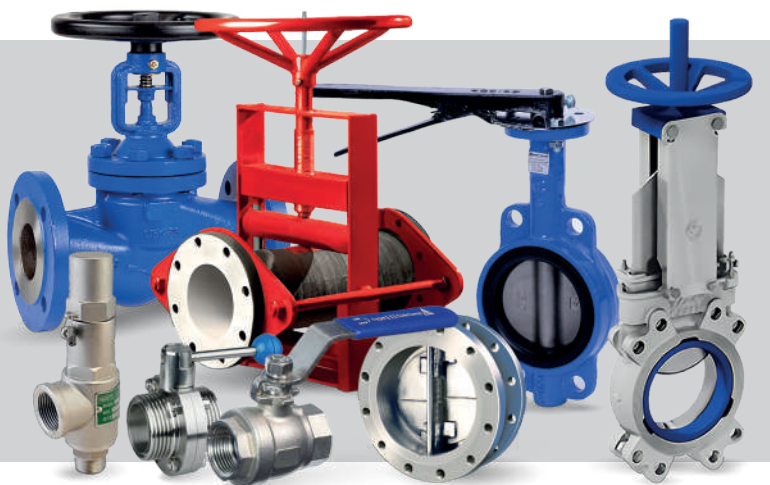

# VALVES & ACTUATORS

# 19

USA / CHILE

There is a wide variety of valves designed specifically for different applications and types of fluids, as well as a range of standards, sizes, and materials. Common manufacturing materials include metals such as stainless steel, carbon steel, brass, hastelloy, duplex, as well as plastic polymers and various interior coatings.

- Butterfly
- Check & Duo check
- Gate
- Knife
- Ball
- Globe
- Pinch
- Thermoplastic
- Actuators
- Y filters & Basket filters

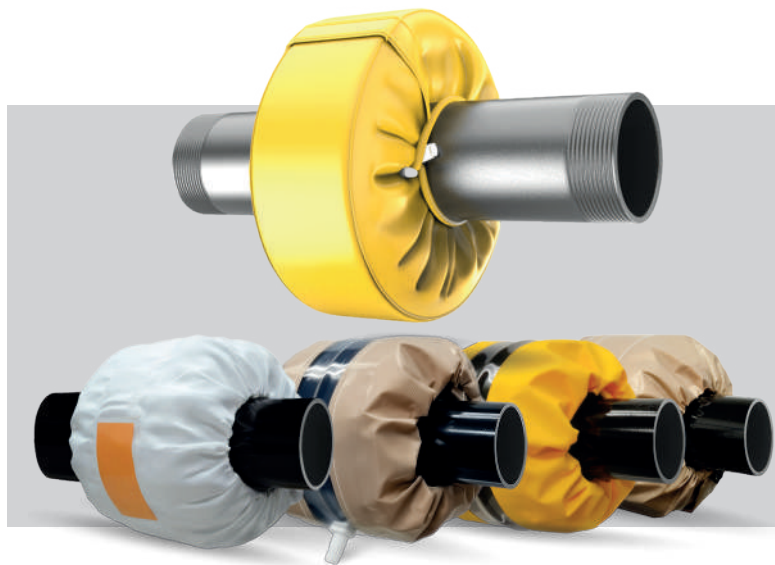

# FLANGE COVERS & VALVE PROTECTORS

# 20

USA / CHILE

These protections help prevent spills and accidents caused by projections of hazardous substances at piping line joints. They are custom-made using PVC or Teflon-coated fabrics, according to the dimensions and specifications of the equipment, parts, and instruments that need to be covered. The protections are available with additional options such as viewports, drip tubes, and pH marker paper.

- Teflon or PVC valve covers
- Teflon or PVC flange covers
- With pH marker paper
- With leak inspection viewport
- Protection for electronic equipment

# EXPANSION JOINTS

USA / CHILE

# 21

The expansion joints are structural elements used to allow axial and radial movements, enabling materials to expand or contract due to changes in temperature, humidity or other environmental factors such as seismic movements, thus preventing structural damage.

- Metal expansion joints
- Rubber expansion joints
- Teflon expansion joints
- Omega expansion joints

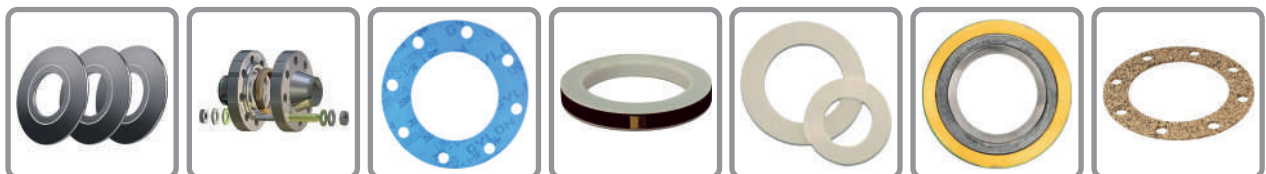

# GASKETS & SPIRAL WOUND GASKETS

# 22

USA / CHILE

Gaskets, also known as sealing gaskets, are elements used to prevent leaks of liquids or gases through the joints of pipes, valves, pumps, and other equipment. They are essential in the industry to ensure the safety of equipment, and their selection depends on the type of fluid being transported, temperature, pressure, and other operational factors.

- Elastomeric gaskets
- Spiral wound gaskets
- Teflon gaskets
- Metal gaskets
- Dielectric/isolation gaskets

**KMX**

KMX is a company with an international presence, specializing in high-quality solutions for the handling and conveyance of complex fluids. We are characterized by an extensive portfolio of technical products and professional services oriented towards companies seeking to improve specific solutions and enhance their production standards.

Our team has extensive technical experience in the application of our products for a variety of purposes in sectors such as mining, shipyards, manufacturing, petrochemicals, engineering, and construction.

We invite you to incorporate us into your projects.
