Custom crimp Dial Micrometer for CC60 Production hose Crimpers

Micrometer Setting Example:

Each 100 on the Micrometer represents 1 mm above the closed diameter of the die set. For example, with a 50mm die installed and the Micrometer set at 250, the finished crimp diameter would be 52.5 mm.

$(50\text{mm} + 2.5\text{mm}) = 52.5\text{ mm}$
