BRAND  
: DIXON VALVE

MODEL  
: SFC400

### Features:

Two-step needle provides fine adjustments at low flow with the first three turns of the adjusting knob.

The next three turns give full-open needle position and conventional throttling control.

When flow is reversed, the heavy-duty poppet/retainer permits full-flow return capacity.

Exclusive color-coded reference scale on the adjusting knob greatly simplifies flow setting, resetting, adjusting and return to an original flow.

A simple set screw locks the valve on any desired setting.
